DIRECT REPLACEMENT FORMAT

Antigravity Batteries now offers the most common OEM type case formats found in powersports vehicles. These standardized case formats are a EXACT replacement fit for most powersports vehicles. By doing this we have created an ultra high power, lightweight and long lasting replacement for the heavy and toxic lead acid battery that comes stock with the motorcycle.

SMALL CASE FORMAT

This case format is what Antigravity originally became known for.... The smallest , lightest and MOST POWERFUL batteries available. The benefits of a compact battery are more room to install items like Power Commanders, and smaller is lighter.... But even our hugely powerful 16-Cell batteries are still only 1/2 the size of a lead acid battery, weigh only 3 pounds but offer TWICE the cranking power! The small case version is offered in 4-Cell, 8-Cell, 12-cell and 16-Cell.

ANTIGRAVITY YTZ7S-4

The Antigravity YTZ7-4 is Direct Replacement for the Lead/Acid version of the OEM YTZ7S . Our Nanphosphate Lithium Technology offer extreme weight reduction, and no maintenance benefits. For significantly better power and starting performance we recommend the Hi-Power version , the YTZ7S-8, double the power of the Lead Acid version.

- 120 CCA
- 6 Amp Hours (PbEq)
- 4.5" Long x 2.75" Wide x 4.12" Tall
- 16 ounces
- Direct OEM Replacement for YTZ7S/YTX4/YTX5
- For motors up to 450cc

ANTIGRAVITY LITHIUM CHARGER

Works with 120 or 240 voltage. Foreign countries just need adapter for plug.

This 4-amp charger is the charger for use with any and all of our Lifepo4 Lithium batteries. With a 4-amp charge rate it offers a fast charge and is a good solid reliable unit for maintaining Lifepo4 (12v) batteries of any size. It can also work as a maintaining type charger for lithium if you have a vehicle with a fast parasitic drain.

For Race vehicles using our larger batteries you can check our 8-amp charger which offers a very fast charge rate for those vehicles used for racing or who want a very fast charge.

- 4 & 8 AMP Charge Rate
- CCCV Charging optimized for Lifepo4 Batteries used in Powersport/Motorsport vehicles with 12v systems
- Short Circuit Protection
- Battery Polarity Error Protection
- Over Voltage Protection
- Over Heat Protection
- Voltage precision to +/- 1%

BATTERY TENDER PLUS

The Battery Tender is a 1.25 amp battery charger that automatically switches from full charge to a float charging mode, and then monitors the battery. When the battery is accepting only 0.5 amps, the Battery Tender switches into a float charging mode. At this point, both the current and the voltage are held at 13.2. The gassing point of a battery is 13.8 volts, therefore applying voltage greater than 13.8 for an extended period of time will damage the battery. Trickle chargers decrease current, but increase voltage to upwards of 15.5 volts, and continue the excessive gassing action that is most detrimental to the life of batteries.

OEM EQUIVALENT

This is our line for distributors to market toward dealers or end users looking for an aftermarket version of the exact unit that came off of their jet ski. You will note that the part # for this series of starters has no suffix code after the number. These starters are built to meet OE specifications. We feel that our competitive pricing, 4 color packaging, and OE equivalent quality allow our distributors an opportunity to offer OE quality starters to any dealer/repair shop at discounted aftermarket pricing. Parts are packaged in our Blue PROTORQUE boxes with blue PROTORQUE stickers on the units and come with a full 2 year warranty from date of sale.

GOLD SERIES

This is our line for distributors to market toward quality conscious dealers or end users looking for an higher performance than original equipment starters. You will note that the part # ends in –G for all of these "Gold series" starters. We feel that our competitive pricing, 4 color packaging, and improvement on OE quality allow our distributors an opportunity to offer higher quality starters to any dealer/repair shop at aftermarket pricing. To improve upon OE specifications, where applicable, we use double seals on the collars of these starters, compared to OE starters which use 1 seal. We also use specially designed heavy duty armatures along with 4 brush sets, where OE starters use only a 2 brush set to assist with better torque and overall power. In certain applications we are also able to incorporate a large alternator bearing into the drive-ends of our units instead of needle bearings. We feel these are a more sound design and helps to stop water intrusion and cuts down armature ripple. Parts are packaged in our Blue PROTORQUE boxes with Gold PROTORQUE stickers on the units and come with a full 2 year warranty from date of sale. For the minimal difference in price as compared to the OE Equivalent starters, most of our upper echelon customers and race teams buy this line hands down.

REDLINE SERIES

This is our line for distributors to market toward price conscious dealers or end users. You will note that the part # ends in –R for all of these "Redline series" starters. We feel that our ultra competitive pricing, 4 color packaging, and very good quality allow our distributors an opportunity to never miss a sale due to price, while still meeting the quality requirements of any dealer/repair shop. Parts are packaged in our Red Power Sports boxes with red PROTORQUE stickers on the units and come with a full 1 year warranty from date of sale.

SEA DOO STARTER MOTORS REPALCES OEM #: 278-001-038, 278-001-301, 278-001-497, 278-001-936

Applications below marked with *** were originally fitted with OEM Part# 278-000-577 (9 Tooth Starter) and were later superseded by Sea-Doo to OEM Part# 278-001-301 (8 Tooth Starter) for all replacements. Although the original starter for this application had 9 teeth and the replacement only has 8 teeth, the drive-end construction was modified on the 8 tooth version, allowing them to interchange without changing the flywheel.

SEA DOO STARTER MOTORS REPALCES OEM #: 278-000-577

Applications below marked with *** were originally fitted with OEM Part# 278-000-577 (9 Tooth Starter) and were later superseded by Sea-Doo to OEM Part# 278-001-301 (8 Tooth Starter) for all replacements. Although the original starter for this application had 9 teeth and the replacement only has 8 teeth, the drive-end construction was modified on the 8 tooth version, allowing them to interchange without changing the flywheel.

NGK SPARK PLUGS

NGK makes plugs for almost any type of application and riding style. Versatile plugs with wide operating heat ranges prevent fouling from running too cool and pre-ignition from running too hot. Features include high alumina ceramics for improved heat dissipation and electrical insulation, deep-seated copper core for a wider heat range, and a nickle alloy tip for longer life. Superior construction for serious power. Sold in box quantities.

NGK RACING SPARK PLUGS

For motorcycles and specialty racing engines come in a variety of tip configurations and materials. They're designed for high-powered engines with increased compression ratios and higher rpm's. They're designed for use under severe conditions, including repeated cycles of acceleration and deceleration and long hours of high-speed running.

To meet the stringent requirements of racing engines and sparking voltage, NGK Racing Plugs have characteristics such as easy sparking and enhanced ignitability, as well as excellent heat resistance, thermal conductivity, durability and mechanical strength.

IRIDIUM IX SPARK PLUGS

The ultimate in the evolution of spark plug technology and performance from the industry leader. The Iridium electrode is 25% smaller than a platinum electrode, and a quarter of the size. Ultra-small diameter center electrode reduces voltage requirement and extends ignition system life. The new metal shell plating has enhanced anticorrosion qualities, making the NGK Iridium IX spark plug the leader.

NGK RESISTOR SPARK PLUGS

Specified as original equipment in a variety of late-model outboard engines, spark plugs with an inductive resistor are utilized when a CDI (capacitive discharge ignition) system is used. The resistor plug is necessary to reduce radio frequency interference (RFI), to prevent interference with the sophisticated electronics onboard modern boats.

1. Remove and separate the whole jet pump from the PWC.
2. Remove the trail cone (or cap) from the stator.
3. Hold the rear end of the shaft with a bench vise.
   Remove the impeller with an impeller wrench(optional part).
   Turning counter clockwise will loosen the impeller.
4. Visually Inspect thread on shaft & impeller for debris or damage. Apply grease or anti-seize on the thread before installation.
5. Screw in impeller by hand; please be careful of the sharp edges of impeller. Tighten with impeller wrench. If impeller feels too tight or not threaded properly, unscrew impeller, clean and check the thread.
6. Assemble the pump and put it back on the PWC.

1. Remove and separate the whole jet pump from the PWC.
2. Hold the front end of the drive shaft with a shaft holder (optional part) on bench vise.
3. Remove the impeller (a free impeller wrench is included with the purchase of a new SOLAS Impellller). Turning clockwise will loosen the impeller.
4. Visually inspect thread on shaft & impeller for debris or damage. Apply grease or anti-seize on threads before installation.
5. Screw in impeller by hand; please be careful of sharp impeller edges. Tighten with the impeller wrench. If Impeller feels too tight or not threaded properly, unscrew impeller, clean and check threads.
6. Assemble the pump and refill 0/E pump oil or grease to spec.

NOTE: This installation guide is suggested for reference only. (Please refer to your original service manual or contact your PWC Dealer for details.)

PUMP CONES

Designed with the freestyler in mind, the freestyle pump cone allows the engine to rev faster for the big tricks. Its small size lets a large volume of water move through the pump with less restriction than with the stock tailcone. This gives you more low end thrust for bigger air. Works great with a bored out stock nozzle to help provide even more low end. Detailed instructions and hardware included.

ULTRA 300 ANTI-CAVITATION CONE

The R&D Kawasaki Ultra 300X/LX Anti-Cavitation Pump Cone Kit will reduce overall internal pump cavitation within the Kawasaki Ultra 300's offset reduction/compression nozzle design. The O.E.M. Ultra 300 reduction/compression nozzle is offset 5 degrees, while the O.E.M. pump cone/bearing cap remains straight which causes uneven pressures within the pump and reduction nozzle.

R&D RIDE PLATES

One of the best bolt-on performance enhancements you can do to your watercraft is to improve upon its handling and stability. Whether you're a recreational rider or a world champion clocking sub-19 second slalom runs, R&D Ride Plates offer unparalleled stability and control. Today's watercraft are capable of unbelievable performance and top speed levels. Voted #1 by the readers choice awards, R&D Ride Plates have been tested far beyond the limits of these new breed of machines. When you're going fast, you need total confidence. R&D Ride Plates increase rider control and handling. Designed for the ultimate ride. Super Jet and GP 800/1200 Ride Plates now available in carbon fiber.

R&D TRIM TABS

Eliminates porpoising. Puts down force on the nose of the craft keeping the boat hooked up and accelerating across rough water.

AGGRESSER SPONSONS

Aggresser sponsons are a must for awesome handling and top speed (up to 1.5 mph gain). They are lightweight, and are streamline in design for the ultimate in handling and top speed (like riding on rails). Aggressers have less drag then other sponsons with a G-Force turning ability. U.V. Protected, and come with a lifetime warranty from breaking.

REMOVABLE- KAWI SXR-HYDROSPACE (IJSBA LEGAL)

There have been only a few inherent problems with racing the Kawasaki SXR and S4 from Hydrospace. The challenge has been keeping the ski hooked up in the turns, and keeping the nose from submerging. Very small complaints against an incredibly well designed bottom hull design.

TUBBIE DESTROYER SIDE SPONSONS - REMOVABLE- YAM SJ 1996-2007

With the Blowsion patented two-plane Tubbie technology we have severely lengthened and re-defined the Tubbie Destroyer two-plane shape specifically to extend the wider footprint needed for Freeriding wave turns and barrels on the Super Jet. This allows the rider to update his 07 and older SJ hull to ride more agressivley in the water emulating the 2008+ Super Jet lower hull design, while still giving the ski the well known benefits of the Tubbies aggressive turning, hook up and bow buoyancy.

TUBBIE DESTROYER SIDE SPONSONS - REMOVABLE- YAM SJ 2008-CURRENT (IJSBA LEGAL)

Racing, Freeriding and Freestyling the new improved 2008+Newer Super Jet hull design has been a thrill for anyone that was frustrated by the 11+ years of no changes or improvements of the SJ by Yamaha. With the addition by Yamaha in 2008 of the Tubbie shape incorporated into the OEM hull, we had very few complaints against an incredibly well designed bottom hull design (especially since we take full credit!).

LOW

- Designed for stock or mildly modified motors
- More air flow at lower rpm's gives a serious boost in low end power
- Ideal for western, high altitude riding styles

MID

- Power gains in the middle of the power curve
- Engineered to respond at lower speeds while maintaining stiffness at wide open throttle
- Ideal for moderately built motors

HIGH

- High tensions are a must for wide open riding, racing applications, or highly modified motors
- Top end power is greatly improved and reed life is superior to any other reed in the industry, especially under demanding applications

The #1 reed, available in different tensions to suit your motor. Carbon Tech uses only 100% aerospace grade carbon fiber. No other reed comes close to the durability and performance gains of Carbon Tech.

REED VALVE STUFFERS

These stuffers require no engine modifications and fit into your stock reed cages. Their aerodynamic design reduces drag to increase flow velocity through the reed cage. The horizontal divider minimizes turbulence and directs flow to the intake ports for quicker acceleration, improved throttle response, and maximum power.

BOYESEN POWER REEDS - STOCK

Boyesen's advanced dual-stage design utilizes a highly responsive, flexible reed which is placed on top of a stiffer, ported reed for superior performance throughout the entire powerband. The specially shaped top reed is lightweight and resilient for crisp throttle or low R.P.M.'s. The stiffer, bottom reeds are ported to provide your engine with maximum flow and horsepower at higher R.P.M.'s. Easy starting and smoother idling for those no wake zones; Instantaneous acceleration allowing you to carve through the waves; Throttle response that delivers performance with a snap of the throttle; Crisper midrange to pull that extra boat length; Improved engine efficiency providing a broader, smoother powerband; Increased fuel economy; Longer reed life-Boyesen Power Reeds outlast all other aftermarket reeds; Performance that delivers a more satisfying ride.

TAU CETI FLAME ARRESTORS

Tau Ceti's Pro Series Flame Arrestors are constructed from top quality materials such as aircraft grade aluminum, stainless steel, and a superior quality rubber base. These Flame Arrestors are designed with both duration and superior performance in mind. Using an extremely light anodized aluminum top and a stainless steel mesh, this product is 100% corrosion resistant. With our free flowing, stainless steel mesh design, we achieve an increase in acceleration and a much better throttle response. The universal rubber mount will fit any personal watercraft with a stock carburetor using the appropriate adapter. No re-jetting is necessary on OEM boats. ***100% Made In The U.S.A.***

K&N PERSONAL WATERCRAFT FILTERS

The K&N Flame Arrestor makes the world's leading air-filtration technology available for marine engine use. For the first time, boat owners can experience the increased horsepower and engine protection provided by K&N's unique oiled cotton gauze and epoxied screen filter element. For high performance on the water, no other product can match the "horsepower-per buck" benefits of the K&N Flame Arrestor.

K&N PERSONAL WATERCRAFT OIL FILTERS

The heart of the K&N Oil Filter is the cotton gauze filter media used in our standard filter elements. Also available as a racing only flame arrestor without cotton media, K&N's Watercraft Flame Arrestors are designed to increase horsepower while staying within the law. K&N's Watercraft Flame Arrestors meet Coast Guard standards and are marine approved.

CAT TEMP SENSOR CHIP FOR GPR

The R&D Cat Temp Sensor Chip is a must when replacing the OEM Catalytic Converter with the R&D D-plate on your Yamaha GPR. The Temp Sensor imitates the signal sent to the OEM CDI by the Catalytic Converter's temperature probe preventing CDI flutters, warning devices sounding and engine shut downs due to cat removal. The use of this sensor is only necessary with the OEM CDI. Plugs directly into factory wiring harness.

ULTRA 300X PERFORMANCE EXHAUST PLATE

The R&D Performance Exhaust Plate replaces the restrictive OEM exhaust honeycomb filter that Kawasaki recommends inspecting or replacing every 25 hours. The R&D Exhaust Plate eliminates excessive exhaust heat and flow restriction produced by the OEM exhaust filter. Improved exhaust flow decreases back pressure, and heat and increase performance. The Exhaust Plate also features small water ports that decrease water flow to the water box, which eliminates hard starting conditions from wet spark plugs. The R&D Exhaust upgrade never needs to be inspected or replaced. Kit comes complete with gaskets to install.

ADR STROKER CRANKSHAFTS

All ADR performance crankshafts are equipped with connecting rods that offer a true chemical composition of 8620 aircraft quality steel which absorb over 12,500 RPM and helps transmit motion balance. These rods are CNC balanced to the gram on the 8mm and 10mm Stroker versions to help reduce vibrations for a smoother running engine. ADR rods were made just for the Yamaha Stroker crankshaft series, the only ones in the world like it and assembled in the USA.

JET TRIBE RACE BOOTS WITH GECKO GRIP SOLE

You have asked for a better riding boot? We at Jettribe have listened. After being on the APBA and IJSBA tour seeing racers and freestyle riders use various shoes from wrestling shoes to skat shoes? We are proud to release the our RS-15 Race Boots with Gecko Grip sole! After careful research and testing we are bring to you a true riding boot that is built around a PWC rider! To start with the sole is modeled after the grip pads from a Gecko , we have built in about 433 individual traction pads. These are stragilicly spaced apart to allow the sole to quickly disperse water between the sole of your boot and the surface of your PWC to allow instant traction and grip to the deck of your PWC. Sole with flat surfaces tends to trap water between the sole and deck tends to provide less grip and traction. Second, the RS-15 rubber soles are design with three raised contact points accommodates a PWC riders aggressive stands. Most of the time we ride from ball of our feet and constancy switching our weight from the heel of our feet to our toes. Plus, the pre-curved sole with arch support allows maximum comfort! The sole wrap around the sides and toes limits the lateral side to side; movement of the riders feet. The extra high neoprene cut of the RS-15 boot limits the rocks and gravel from getting in. It has a front zippered entry for easy slip on or off. Plus three adjustable velcro straps for a snug and better fit.

ULTRA'TECT™ WATERCRAFT COVERS

Ultra'tect™ was developed from the need for a cover that would retain its color and strength during extended outdoor exposure, while providing a high degree of water resistance and UV protection at a reasonable price. Ultra'tect is made from solution-dyed WeatherMax® SL fabric. Ultra'tect is a high-performance fabric at a moderate price - easy to use, easy to clean, great UV resistance, good breathability and excellent fade resistance.

JETTRIBE PWC COVERS

Jettribe covers are typically 9 to 12 lbs. Compared that to other brands at only 4 to 6 lbs! We added 4,1.5" webbing detachable tie downs, then we ran shock cord bungee all around the bottom leading edge. For weather resistance, our materials are specially UV coated. For water resistance, the material is coated with clear PU backing to keep out the water. All our seems are triple stitched and finished off with a binding. The inside hood area is lined with soft nytex material to protect your PWC from getting scratched paint. All pin or eye bow areas are reinforced with our tough 1680D Ballistic Nylon material.

HULL HUGR™ PWC FENDER

Docking a PWC has never been safer with the introduction of the HULL HUGR PWC Fender. Engineered specifically for PWCs, it hinges in the center to better protect PWC bodies from docks designed for bigger boats. It hooks under the rub rail with a molded acetyl hook integrated into the back of the fender. If your PWC has them, you'll want to connect the top of the fender to a cleat or ski eye with the adjustable strap and vinyl dipped steel hook provided. The block anchors the fender strap perfectly and will not damage the body. We recommend 2 fenders per PWC. Fits all PWCs.

2336120	37-HHP1B	HULL HUGR PWC FENDER	$19.99

NO SLIP™ FENDER STRAPS

No more tying and untying knots! Attach boat fenders to rails and cleats quickly and securely with these fender straps. The NO-SLIP™ pads sewn to the underside of the straps minimize sliding along rails. Easily adjust the length in seconds from 6 in. to 40 in. to fit most boats and docking situations. Color: White. 2 per package.

PART #	DESCRIPTION	RETAIL
2332086	NO SLIP FENDER STRAPS	$7.99

PWC FENDER

Designed to custom fit the profile of most PWC's. The fender bottom is shaped to "hook" under the bond flange for quick attachment. Flex areas on the fender provide a "hinge" action that allows the fender to conform to the shape of the watercraft. The PWC fender features an inflation valve for air pressure adjustment and includes a suction cup and securing line.

AIRHEAD SUPER PUMP™

This is the best performing 120 volt air pump available, inflating and deflating at unprecedented speed. Peak pressure is nearly 3.0 psi, plenty of pressure to get boats, dinghys, rafts and reinforced backyard items nice and firm. Four universal adapters are provided to fit all valves commonly used on boats, kayaks, towables and other inflatables. The adapters lock onto the 36 inch long heavy duty reinforced hose. A Pressure Release Valve is included to limit pressure to 1.4 psi for preventing over-inflating towables, pool toys and other vinyl and nylon covered inflatable items. The accordion-style hose locks onto the pump, eliminating annoying disconnections. You'll love the convenience of the screw-on Boston Valve adapter, an AIRHEAD exclusive. For added convenience, there's a carry handle and a 10 ft. long power cord. It draws 7.1 amps / 917 watts. Volume is 480 liters/minute.

2335054	FOOT BELLOW PUMP	$17.99

AIRHEAD DOUBLE ACTION HAND PUMP

This pump delivers a continuous stream of air on both the up and down strokes. It inflates and deflates, by simply changing the hose connection. Ideal for tubes, airbeds, boats, toys and other inflatables. Four universal valve fittings are included. The accordion-style hose stretches to 5 ft. long and interlocks to the pump, so that it doesn't fall off while you're pumping. The handle and foot plate are ergonomically designed for your comfort. It's manufactured from lightweight, non-corrosive plastic and disassembles easily for inspection or maintenance. Capacity is approximately 68 gallons / 60 strokes.

2335050	DOUBLE ACTION HAND PUMP	$21.99

AIRHEAD BOSTON VALVES

Always carry a spare! The 2 Boston valves have different thread patterns. One is sure to fit the thread pattern of your inflatable, no matter what brand. They have square bases, which are much easier to turn than round, especially with wet hands. Bright red, so they're easy to find.

PART #	DESCRIPTION	RETAIL
2332079	BOSTON VALVES, 2-PACK	$5.99

AIRHEAD MULTI-VALVE

The Airhead Multi-Valve consists of 2 Boston valves with different thread patterns on the bottom and a Shrader valve. One of the Boston valves will fit your inflatable. Use the Shrader valve to inflate quickly at a gas station or marina. Or, screw off the Shrader valve and inflate the Boston valve with a low pressure/high volume pump.

AIRHEAD WATERSPORTS FLAG HOLDER F/ WAKEBOARD TOWERS

It's been difficult for boaters with wakeboard towers to display water sports flags effectively, until now. Instead of manually holding the flag, stick it into the holder and your flag will fly high so that other boaters can see it. It also frees your hands to tend to other activities. This one-size-fits-all water sports flag holder is designed to attach easily and fit perfectly on all OEM and aftermarket wakeboard towers. It is crafted from billet aluminum, then polished and anodized. Stainless steel hardware, polymer collars and adhesive backed pads are provided for quick and easy installation onto all wakeboard towers, 1-5/8" to 2-7/8" diameter. No drilling required. Flag not included.

All STIFFIE Alphanumeric Identification kits resist fuel spillage, chemicals, fading, scratching and curling. The decals are also UV Clear Coated for protection from harmful Ultra Violet rays emitted by the sun. We use only LEAD-FREE inks on all of our decals. This ensures that our product is environmentally friendly. STIFFIE offers more styles and color combinations to match your vessel than any other manufacturer. STIFFIE has developed an exclusive color coding and print method known as COLORCLONE™. We guarantee our products to color match your OEM Factory color scheme if you select one of our reccomended part numbers.

EASY APPLICATION: Just peel the decals from their backing and stick them in place. A complete set of registration decals for your Boat, PWC or Snowmobile

The STINGRAY AlphaNumeric Identification kit provides that ultra casual, "I live on the water" vibe" to your registration decals. If you want a design that was inspired by the movement of water then this is it. It is offered at a reasonable price while maintaining the ultimate in our top of the line quality standards. Every kit includes 4 decal sets of the letters A-Z and the numbers 0-9 for a total of 146 decals. TheSTINGRAY style is a two color design. It features a brush style font, zero slant, inconsistent free form characters and an exterior to interior color fade-in. The gradation fades in from the top downward. This design is topped off with a heavy, wide bodied offset exterior outline. This makes overlapping the individual characters very easy, enabling you to create a unified, custom look like never before. Who said your registratration decals have to look like you ripped them off of your mailbox? If you are looking for a free flowing, on the water inspired style in addition to outstanding visibility then this style is probably for you.

The TECHTRON AlphaNumeric Identification kit has filled the void that once was racing inspired registration decals. If you want a race ready, fast forward look in your registration decal then this is it. It is offered at a reasonable price while maintaining the ultimate in quality and cool. Every kit includes 4 decal sets of the letters A-Z and the numbers 0-9 for a total of 146 decals. The TECHTRON style is a two color design. It features a forward facing slant with an exterior color fade-in gradiating from the bottom upward. It's circle track / auto racing form is the basis of the individual characters set off by an interior half toned highlight. Additionally, the TECHTRON design features 2 interior accent stripes that look like they were carved into the face of the interior character. This design is topped off with a heavy, wide bodied exterior outline. This makes overlapping the individual characters very easy, enabling you to create a unified, custom look like never before. Who said your registratration decals have to be boring? If you are looking for an aggressive, speed insired style in addition to functionality then this style is probably for you.

EXTREME DUTY MARINE SAE 20W-50 ENGINE OIL

Lucas Extreme Duty Marine SAE 20W-50 Engine Oil is designed for use in high performance boats requiring the ultimate protection.

Lucas Extreme Duty Marine SAE 20W-50 Engine Oil is manufactured with the highest quality paraffinic base oils and is fortified with an exclusive additive package containing high levels of Zinc, Moly and Phosphorus that provides a tougher, thicker additive film for maximum protection even under the most sever conditions. It lowers oil temperatures, extends oil life and minimizes metal fatigue.

Lucas Marine SAE 20W-50 improves the film strength between the cylinder wall and piston rings and slows oil burning while improving pressure levels in worn engines. It has good cold temperature properties and stands up to high operating temperatures. This product is compatible with methanol and all racing fuels.

THREEBOND 1200 GASKET MAKER

1200GAU GRAY is a general purpose OEM Specified RTV Silicone (as opposed to TB1184 which is a synthetic rubber based LGM). 1200GAU is characterized by wider temperature range with strong resistance to heat and cold. 1200GAU has a working temperature range of: -60C to +200C. 1200GAU is an OEM certified product for engine and drive train assembly. It also finds a wide range of applications throughout the recreational / automotive / power sports industries. Three Bond '1200' Series LGM's are both OEM Certifed and OEM Specified. (TAC FREE TIME: 6-8 min)

PART #	DESCRIPTION	RETAIL
9050002	HIGH PERFORMANCE GRAY SILICONE GASKET - 3.8 OZ.	$10.95

THREEBOND THREAD LOCK

Low Strength (Blue)-Frequent Removal

Medium Strength (Green)-High Temperature

High Strength (Red)-Studs and Bearings

PART #	DESCRIPTION	RETAIL
9050011	FREQUENT REMOVAL - BLUE	$7.35
9050010	HIGH TEMPERATURE - GREEN	$7.35
9050012	STUDS AND BEARINGS - RED	$7.35

THREEBOND GRIPLOCK

A high strength adhesive specially formulated to keep grips in place without damaging the rubber. Griplock puts an end to grips twisting or sliding off. Ideal for motorcycle, PWC, snowmobiles & ATVs.

PART #	DESCRIPTION	RETAIL
9050009	THREEBOND GRIPLOCK	$8.10

THREEBOND 1184 GRAY SYNTHETIC GASKET

1184 (formerly 1194 and 1104) is a Low Viscosity, OEM Spec., SYNTHETIC RUBBER LGM (liquid gasket maker) As opposed to an RTV Silicon LGM. Characterized by strong resistance to Gasoline, Oil, Water and Coolants. Excellent for sealing engine cases, flanged surfaces, screw sections and .... many other applications. The product has a long standing reputation with motorcycle. power sports, JDM and racing enthusiasts. 1184 is an OEM Specified, OEM Certified product used by engine manufactures throughout the world (TAC FREE TIME : 12 min) TB1184 has a working temperature range of -40C to +150C.

PART #	DESCRIPTION	RETAIL
9050014	HIGH PERFORMANCE GRAY SYNTHETIC GASKET - 3.5 OZ.	$10.95

THREEBOND 1207 BLACK SILICONE GASKET

1207B BLACK: High Performance, High Viscosity, High Heat, High Torque, High Vibration, High Adhesion LGM. 1207B could be considered as an Ultra High Performance LGM. Primary features: Exceptional resistance to high torque and high vibration conditions even in High Heat conditions. Excellent adhesion properties allowing the product to work well with metals and plastics. Primary applications: Engine and Drive Train Assembly although like TB1200GAU, TB1207B is finding a wide range of uses in the automotive / motorcycle / power sports / marine / recreational industries. 1207B is an OEM Certified, OEM Specified product. (TAC FREE TIME: 7-9 min). 1207B has a working temperature range of: -60C to +200C.

PART #	DESCRIPTION	RETAIL
9050006	HIGH PERFORMANCE BLACK SILICONE GASKET - 3.5 OZ.	$15.95

THREEBOND 1211 WHITE SILICONE GASKET

1211 WHITE is a Low Viscosity, High Performance, OEM Specified RTV Silicone Engine Sealant. This is also an exceptionally 'High Performance' OEM specified product with the key differentiation of Low Viscosity (much thinner product) and much Longer set time (90 min). The long set time allows for delayed assembly after application. And the low viscosity makes for a thinner more 'low profile' and 'closer fit' engine seal. This OEM Certified, OEM Specified product is a favorite for high performance motorists world wide. (Tac Free 90 min.) 1211 has a working temperature range of : -60C to +200C

PART #	DESCRIPTION	RETAIL
9050013	HIGH PERFORMANCE WHITE SILICONE GASKET - 3.5 OZ	$21.25

THREEBOND 1521 SYNTHETIC RUBBERIZED ADHESIVE

TB1521 is a Multipurpose Synthetic Adhesive. However unlike other adhesive products on the market TB1521 is 'rubberized'. When cured it does NOT become hard and brittle but retains limited flexability and elongation. The result is far longer duration in application. Used on Matts, Guards, Rubber Edges stick better and longer than with conventional adhesives. Recommended on Water Craft.

PART #	DESCRIPTION	RETAIL
9050001	OEM APPROVED SYNTHETIC RUBBERIZED ADHESIVE - 3.5 OZ	$9.95

CRC® ELECTRONIC CLEANER

Instantly removes oil, grease, dirt, flux, and other contaminants. Helps prevent contact failure or malfunction. Evaporates quickly, leaves no residue. Harmless to most plastics.

ANCOR MARINE GRADE™ PREMIUM PRIMARY WIRE

ANCOR's primary Boat Cable is made to American Wire Gauge standards which means up to 12% more tinned copper conductors than SAE wire. Our premium vinyl insulation provides greater cold bending ability, heat shock, water resistance, flame resistance and chemical resistance than the General Purpose Thermoplastic (GPT) found in other wire. Our UL and CSA approved tinned copper Type 3 stranding resists fatigue, failure and corrosion. ANCOR supplies a full line of Marine Grade™ primary (single conductor) wire in sizes from 18 AWG to 10 AWG, all in ABYC recommended colors, and in standard lengths from 8 foot mini-spools to 100 foot bulk spools. All of ANCOR's wire and cable is Made in the USA.

ANCOR BATTERY CABLE

Unlike welding cable or SAE wire, ANCOR Marine Grade™ battery cable features: Tinned copper stranding for maximum protection against corrosion and electrolysis. Ultra flexible (Type 3) stranding resists fatigue due to vibration and flexing. Premium vinyl insulation that resists salt water, battery acid, oil, gasoline and ultra-violet radiation, is rated at 600 volts and 105° C. Heavy duty insulation, resistant to heat and abrasion. ANCOR Marine Grade™ battery cable exceeds all UL 1426, US Coast Guard Charter boat (CFR Title 46) and ABYC standards.

ANCOR BATTERY CABLE ASSEMBLIES

ANCOR Marine Grade™ Standard Battery Cable Assemblies are manufactured with ANCOR's premium UL1426 tin copper battery cable. The battery cable is fine stranded to produce maximum conductivity and flexibility. In addition, all ANCOR battery cable is flame retarded, UV inhibited, rated to 600V and 105°C. The lugs are tin copper to avoid corrosion and last longer. Each end has a piece of ANCOR's adhesive lined 3:1 heatshrink tubing placed over the electrical connection. The heatshrink tubing seals out moisture and other corrosive elements found in the marine environment. This ensures a longer lasting battery connection.

HEAVY DUTY LUGS

ANCOR provides copper battery terminals which are 100% tinned plated and do not come loose or lose conductivity like lead terminals. Lead terminals are much softer and can loosen due to "cold flow" of the metal and are more subject to oxidation which leads to dangerous power losses. Tinned copper terminals are up to 40% more conductive than lead terminals for optimum performance, especially with high amperage devices like inverters and windlasses.

ANCOR ADHESIVE LINED HEAT SHRINK SPADE TERMINALS

Tinned for corrosion resistance. Pure copper for maximum current flow. Brazed seam for maximum strength. Nylon insulator preferred by experts, for Marine Grade™ resistance to sunlight, water, oil, chemicals, vibration and cut-through damage. Adhesive built into heat shrink tubing shrinks to form a tight seal and the ultimate in vibration and strain relief.

INSULATED FLANGED SPADE TERMINALS

Tinned copper for maximum corrosion resistance and greatest electrical conductivity. Grooved barrel grips wire to provide superior holding power and current flow. Nylon insulator resists sunlight, gasoline, oil and chemicals – will not punch through. Crimp ridge positions the crimp tool to prevent miscrimps. Brass sleeve crimps on wire insulation to provide fatigue and strain relief. Funnel entry guides wire into position and prevents strand turnback.

CARBON FIBER HULL EXTENSIONS

Blowsion hull extensions are constructed of a carbon fiber composite combination. They are epoxy glued and screwed to the back of the ski. They can be trimmed down in length once installed (4" length to start- the IJSBA rule is 3.9" max). Our exclusive inward tapered side extension length is not a "universal" length- once again we manufacture them oversize so our customers can trim them down to adjust for differing rider weights, and riding style (ie; more nose pressure / less nose pressure). Blowsion hull extensions will fit with any ride plate available on the market. IJSBA Race legal. Not recommended for freestyle unless you prefer to keep the nose down. Sold as a pair. NOTE: Blowsion hull extensions extert too much nose pressure if you do not match them with the matching Blowsion side sponson set.

BLOWSION CAS BILLET ALUMINUM ONE WAY VALVE SCUPPER

The new CAS flow valve design prevents water getting in during tail stands, wave jumping, or all-out buoy shredding. The new billet flange assembly is the premium design setup and allows use of the Blowsion billet exhaust outlet so vain riders can sanitize both sides of the rear of their watercraft. The aluminum, rubber, and injection molded construction of the Blowsion one-way valve assembly along w/ the recessed internal mounting results in a bulletproof set-up. Fits all years Super Jet, KAWI 750 and SXR 800, KAWI 650, and Polaris Octane. Each preassembled kit includes explicitly detailed instructions, two Blowsion molded glue able urethane bulkhead and ski flanges for leak less sealing, recessed one-way flow valve, special flex tubing (allows for off center mounting unlike straight PVC tube scupper systems) mounting epoxy and stainless fasteners.

VACATE VALVE

Machined from 6061 aluminum and clear anodized for corrosion protection, the Vacate Valve operates on the same principle as the Blowsion One Way valve, using the forward motion of the watercraft and gravity to allow ingested water to simply vacate the hull in one direction only. Direct threaded replacement for the flimsy OEM plastic drain plugs, the Vacate valve also simplifies interior flushing of the engine compartment.

HOOD STRAP KIT

Blowsion Hood Straps run the length of the hood under the handlepole. High impact plastic Quick Release latch. All stainless mounting hardware included and detailed instructions. Adjustable to fit all models of stand-up PWC. Blowsion Hood Straps Kits are not meant as replacements for the factory latches but rather as support for an otherwise weak piece of engineering. The Blowsion hood straps share the burden of keeping the hood on, along with the factory latches, during aerial and underwater maneuvers. The Blowsion hood straps are routed front to back to offer the most aesthetically pleasing and functional hood seal support without major modification to your craft. Available for all stand up FX1, SuperJet, KAWI SXR 800, 750 SX, 650 SX & all JS models. Used, tested and abused by Pro riders Ross Champion, Pierre Maixent, Joe Kenney, Air Darin Anderson and more. A must for ocean or big wave riders! Now available in Blowsion Logo Sublimated Carbonite Black color.

FUEL PICK-UP

Introducing the new Blowsion Yamaha Fuel Pickup. Designed with the option for use as a single, dual and triple pickup this billet beauty is the lowest profile and lightest weight internal fuel filler available. Features include heavy duty O-ringed tank and fuel cap seals, machined aluminum fuel pickup tubes for retrieving fuel under the most insane water action, (also resulting in maximum pickup tube depth for increased run time!). Pickup tubes can also be trimmed and used for reserve line, return line or tank vent, depending on carburetor setup and fuel demands needed. Each filler includes block off plugs for single carbs or OEM Yamaha carbs as well as a Blowsion front rubber tank block off. No OEM tank modifications necessary. Fits all years 1990 to current Yamaha Super Jet.

Champion Jet Ski Racer , Tommy "the Bomber" Bonacci and created for active sports people, in or out of the water. Bomber Sunglasses are Patented with a foam rubber lining that: floats (for water recreation), provides extra comfort (for longer wear), and provides extra snug fit which helps prevent glasses from blowing off when turning your head on a boat or motorcycle... a feature that could help avoid accidents. Safety Features.... ANSI Z87.1 1989 Osha Approved safety feature required for many industry jobs. The "A-Bomb" and "ZF-Bomb: models exceed the standards to get this special mark which is stamped on the right side of the frame. The frame and lens must be molded together to avoid lenses from falling out. Bomber frames & lenses are made of polycarbonate, which is an element of bullet proof glass, to enhance your eye protection and peace of mind.

To commemorate over ten years of thrashing the world's idea of what eyewear should be like, we are introducing the Bomber LTD series to celebrate. Having the ability to dominate in any land, sea, or air arena, the Bomber LTD series was designed with the ultimate thrasher in mind: ideal for motorcycle riding, mountain biking, cycling, jet skiing, boating, wake boarding, snowboarding, surfing, paddle boarding, skiing, construction work, industrial work, etc. -basically, ANY indoor or outdoor work or play requiring eye safety and protection.

Seloc has been the leading source of how-to information for the marine industry since 1974. Designed and written to serve the needs of the professional mechanic, do-it-yourself boat enthusiast, Technical School Instructor and student, our manuals are based on actual teardowns performed by our editiors.

Seloc offers a full line of printed manuals with complete coverage on everything from basic maintenance to complete engine or drive overhaul; featuring simple-to-follow, step-by-step, illustrated procedures, hundreds of exploded views, photographs, tables, wiring diagrams, specifications, and user friendly indexes. Many of our newer manuals contain a skill level rating system for each procedure which also include special tool icons.

THE ORIGINAL GLOVE

Despite its imitators, our Original® Glove remains in a category all its own. Tried, tested and proven for over 20 years, it provides the perfect blend of flexibility and protection. Durable synthetic leather, stretch spandex finger gussets and a new flexible TPR wrist closure allow for a comfortable and snug fit. With its gamut of practical and functional features, it's no surprise that the Original® is the most recognized and most frequently worn glove for anyone with a toolbox.

THE ORIGINAL HIGH ABRASION GLOVE

Stop throwing away perfectly good gloves due to shredded fingertips. We've covered the fingers and thumb of our Original® Glove with ultra grip, longwearing Clarino High Abrasion Resistant (HAR™) material. Extending up the fingertips, this material provides 60% more coverage and protection in these high wear areas and fuses into synthetic leather or spandex at the top of each finger, reducing potential failure of fingertip seams.

SHOP APRON

Many of the historical design features have been utilized in this new apron having been perfected in previous versions – the upper chest pocket and lower center slit are such features. The Ballistic Nylon construction, double stitching, adjustable length-wide webbing neck and waist straps, internal hanging pockets and dual side of the waist hammer hanger loops all add to the function and useful features of the Mechanix Wear Apron. Resistant to water and certain solvents and machine washable. Fits waist sizes 28 to 44.

AO COOLERS

AO coolers are the best soft-sided coolers in the industry. Don't be fooled by imitation coolers made to look like ours. We were the first to introduce these innovative coolers over 25 years ago.

AO Coolers are guaranteed to never leak or sweat. Our high quality vinyl liner is the same material used to make waterbeds and above ground pools. The inner insulation is three-quarters of an inch thick, high-density, closed cell foam. The combination creates a cooler that will hold ice for 24 hours in 120-degree heat. With our soft exterior, it won't scratch up your gel coat or tear up any upholstery.

Because of our confidence in this product we guarantee the coolers for life. If it ever leaks we'll replace the liner. Tested, used, and sold by many of the performance boating industries and top manufacturers. This cooler will be the best cooler you will ever purchase.

FOREWORD AND GENERAL INFORMATION

GENERAL INFORMATION

We value your business and are committed to provide you with the type of reliable service that you and your customers demand. We do not sell retail. We sell our products to legitimate retailers such as Marine, Watercraft and Motorsports dealers who sell to or provide service to retail consumers.

ORDERING INSTRUCTIONS

To place orders -

Lorenz and Jones Marine:

Phone - (515) 964-4205

Fax - (515) 964-0678

Email - order@ljmd.com

On-Line - www.lorenzandjones.com

Our phones are answered from 8:00 AM to 4:30 PM CT Monday through Friday at Lorenz and Jones Marine (we endeavor to ship all Lorenz & Jones Marine orders received by 4:30 PM CT the same day), and from 8:00 AM to 5:30 PM PT at our California location (we endeavor to ship all California orders received by 5:30 PM PT the same day.) After hours, you may leave a message for any of our staff by utilizing our voice messaging system or record an order for processing the next business day. Our website(s) are available 24/7 for ordering and other information.

If you wish to order on-line, please contact us for a User ID and password.

All items you order with us are reserved for you as you place your order. We will advise you of any out of stock items as well as expected receipt date or possible substitutes. We will ship any size order, however due to the costs of processing small orders; orders below $25 will have a $5 charge added to the invoice. We are happy to drop-ship an order for a customer, a drop-ship service fee of $4 is applied to drop-ship orders.

CREDIT AND PAYMENT TERMS

All orders will be shipped C.O.D. or must be paid by credit card unless prior credit has been established with us.

Our open account terms are Net 10th Prox. This means that all purchases invoiced during a month are due and payable on or before the 10th of the following month. Statements are sent at the close of each month's business.

Open account terms are only available to well rated firms. Prompt payment of statements is essential to retain open account status. If any open account becomes past due, the account will be placed on a COD or hold status. We feel that if a customer is having a difficult time in clearing up an account, it is not fair to them or to us to continue selling on open account terms, making the balance even larger and more difficult to pay.

An account that has gone past due will be charged interest at the rate of 1-1/2% per month. (This is equivalent to an annual percentage rate of 18%). A service fee of $25 will be charged to all returned checks.

We currently accept check, most major credit cards and ACH for account payment.

SPECIAL ORDERS

Our catalog has been arranged for your convenience by grouping related items as much as possible. If you cannot find the item(s) you need in our catalog, we will be happy to try to obtain them for you. Please allow extra time for delivery, usually two to four weeks. We suggest that you secure a deposit from your customer, as special ordered merchandise cannot be cancelled or returned for credit. All special ordered merchandise that is drop shipped from the factory is F.O.B. factory.

PRICES

The prices shown in this catalog are suggested retail prices, Dealer Net Prices are found in our separate confidential dealer price book or online at our website. This printing supersedes any and all prior catalog prices and price supplements. We reserve the right to correct printing errors. Prices are subject to change without notice. All orders will be billed at prices in effect at time of shipment. As new merchandise arrives in our warehouse, we will be updating our prices accordingly. Because of the magnitude of price changes and the variable effective dates of over 250 suppliers, no new price list will be printed until the next year's catalog is published. During that time period we suggest you contact customer service, visit our website or review your invoice carefully to obtain current prices. If you need a large quantity of an item, please ask your sales representative if a quantity discount is available.

FREIGHT AND SHIPPING

Ground transportation charges are deductible on orders of $300.00 or more at dealer net, when your account is paid on or before the 10th of the month (may not apply to certain "drop-ship" programs or special ordered merchandise). Orders shipped via common carrier (truck freight line) will be shipped freight prepaid and the freight charges invoiced separately. If the shipment qualified for deductible freight, you may deduct the freight billing when paying the original order within terms. This program applies to Continental U.S. orders only.

Deductible freight program excludes "priority" freight and special charges (such as C.O.D., Additional Handling, Hazardous Materials and Drop-Ship fees). Freight will be prepaid on all COD orders that qualify for freight. Some items in our catalog are subject to a carrier additional handling fee. Any parcel measuring more than 60", over 70 lbs. or shipped in a non-standard shipping container is subject to this charge. Currently the fee is $8.50 and applies to UPS & FedEx shipments. Carrier additional handling charges are not deductible. Some items in our catalog are subject to a carrier large package surcharge. This carrier surcharge applies to packages over 130" in girth. Currently the surcharge is $55 and applies to UPS & FedEx shipments. Carrier large package surcharges are not deductible. Some items in our catalog are subject to a Hazardous Materials fee. This carrier surcharge currently ranges from $15.00 to $27.50 depending on the carrier. Carrier hazardous materials fees are not deductible. All regulated materials, hazardous and ORM-D will be shipped standard ground service only. No freight will be allowed on past due accounts. No Exceptions.

Unless specific shipping instructions are given, we will use our own judgment in selecting routing. On freight deductible shipments, we reserve the right to select reasonable cost effective transportation.

FREIGHT/DELIVERY CLAIMS

Merchandise lost or damaged in transit becomes the responsibility of the carrier. It is important to obtain a signature from the driver before accepting delivery on short or damaged shipments. We cannot accept responsibility for product damaged in transit, or short quantities, after you have signed a clear bill relieving the carrier of any further obligation. If you have a shipment that is short or damaged, please notify us immediately so that we may trace the shipment or file a claim from our office. Please retain all boxes and packing material until the carrier has inspected and/or reclaimed the shipment.

CUSTOMER "WILL-CALL" ORDERS

We ask that you place orders for pick up at our warehouses at least one hour in advance of arriving. Our Ankeny will-call hours are the same as our telephone hours while an California will-call order must be phoned in by 4:00 PM PT and picked-up by 5:00 PM PT. If you are sending your customer to the warehouse to pick up your order, we cannot add on to the order, or show additional items to them, as we are not staffed to handle retail functions. We appreciate your understanding in this regard.

RETURN GOODS POLICY

You may return product in its original condition (original package without price stickers, damage, etc.) within 30 days of receipt of your order for a credit with the exception of a few items. Authorized returns are subject to a restocking and/or repackaging charge.

The following policy outlines the conditions and requirements under which we will accept returned merchandise.

A.) **Dealer must contact us for return authorization for each item being returned.** We will issue you a return authorization number that must be on the outside of each carton being returned. We are not responsible for products sent back to us without a return authorization number. Issuance of a return authorization number does not assure that a credit will be issued or that an exchange will be made.
B.) Merchandise must be returned within 30 days of the original ship date.
C.) Product must be returned in the original un-opened carton, and must not be "shelf worn".
D.) If repackaging is required, a repackaging fee may be deducted from your credit.
E.) Special Ordered, clearance or close-out merchandise is not-returnable.
F.) All returns must arrive prepaid. Credit will be issued for shipping charges when appropriate; such as an item returned due to a shipping error.
G.) No credit will be issued unless all of these requirements are met. We do not issue refunds, only credits.
H.) Please make sure to adequately box and cushion your return to protect both the contents and the consumer display packaging. Do not put shipping labels directly on the consumer packaging.

It is our intent to serve our customers to the best of our ability and be as fair as possible in this regard. It is not our policy to accept the return of a dealer's "overstock", with or without a handling charge.

RETURN GOODS POLICY

(Warranty or Defective Items)

We offer no warranties whatsoever; expressed or implied, oral, written or other, to purchasers. Many of the items that we sell have warranties provided by the product manufacturer. We will, on the dealer's behalf, make every reasonable effort to obtain warranty authorization from a product's manufacturer, and will notify the dealer as soon as a warranty has been issued or declined by the product manufacturer.

"Defective Merchandise" returns are of two types:

Type "A" defective is merchandise that is brand new and determined to be defective at or prior to the point of sale or installation. Type "A" defective merchandise in new condition, is returnable for replacement or full credit as long as return authorization has been issued, and inspection by our customer service department and/or the manufacturer verifies the claim.

Type "B" defective is merchandise that has been sold and later failed in service while within the warranty period. Type "B" defective merchandise is covered by each individual manufacturer's warranty policy. We will assist our customers in the handling of such warranty claims, as well as items returned for non-warranty repair work. Please note, some manufactures require that the dealer or the consumer contact them directly for warranty issues. When you call us for return authorization we will advise you to contact the manufacturer if necessary.
